Job Description

[Artificial Intelligence & Engineering](#)

AI & Engineering leverages cutting-edge engineering capabilities to help build, deploy, and operate integrated/verticalized sector solutions in software, data, AI, network, and hybrid cloud infrastructure. These insights are powered by engineering for business advantage, helping transform mission-critical operations.

Join our AI & Engineering team to help transform technology platforms, driving innovation, and help make a significant impact on our clients' achievements. You'll work alongside talented professionals reimagining and re-engineering operations and processes that could be critical to businesses.

Position Summary

Level: Senior Associate

Work you'll do:

A senior Business Operations resource will oversee and optimize fund operations and reporting across client deliverables, fund statistics, performance/GIPS, and financial statements, ensuring consistent execution and risk-managed outcomes. The resource will direct third-party service oversight (transfer agents, administrators, banks, and

deliverables (e.g., 15c and SEC filings), coordinating closely with PM, Risk, Legal, and Compliance to support launches and regulatory change. The resource will lead continuous improvement initiatives through process standardization, KPI-driven governance, and technology enablement to improve scalability, quality, and efficiency.

Qualifications

Must Have Skills/Project Experience/Certifications:

- **6-9 years of hands-on experience in Microsoft Office tools including Word, PowerPoint Excel and Outlook**
- **Support the creation and maintenance of client reporting templates, aggregate and populate data content and client reports within defined reporting templates, review client reports / documents for related disclosures and footnotes based on approved templates, publish**
- **Support the management of inbound, pre-defined cash files from transfer agents systems including notification/communication with portfolio managers, manage oversight of transfer agent performance, responsible to ensure connectivity with intermediary partners for fund launches, liquidation, due diligence, etc.**
- **Monitor nightly receipt of NAV across all in-scope fund products, publish and distribute fund statistics to in-scope clients (e.g. daily, monthly quarterly) as identified from defined team email alias, post reports to applicable web portal for website publication, work with product strategy, Risk, PM Legal and Compliance teams to understand upcoming regulatory changes or new fund launches that may impact fund reporting data, track and report metrics.**
- **Understanding of associated GIPS requirements and standards related to calculating and presenting investment performance, recommend composite construction parameters including defined strategies, perform data checks and outlier reviews, work with third parties to support verification requests, perform account level quality control activities including validating composite construction, etc.**
- **Perform reconciliation, oversight and administration of proprietary income and accounting yield forecasting, conduct and analyze income, expense, and distribution yield projections and analysis at security and fund level, and identify, investigate and resolve data anomalies and forecasted vs actual differences to challenge and improve forecasting**

Functions:

aggregate and populate data content and client reports within defined reporting templates, review client reports / documents for related disclosures and footnotes based on approved templates, publish and distribute project approved client reports to in-scope clients.

Transfer Agent Oversight

Support the management of inbound, pre-defined cash files from transfer agents into client systems including notification/communication with portfolio managers, manage oversight of transfer agent performance, responsible to ensure connectivity with intermediary partners for fund launches, liquidation, due diligence, etc.

Fund Statistics

Monitor nightly receipt of NAV across all in-scope fund products, publish and distribute fund statistics to in-scope clients (e.g. daily, monthly quarterly) as identified by project from defined team email alias, post reports to applicable web portal for website publication, work with product strategy, Risk, PM Legal and Compliance teams to understand upcoming regulatory changes or new fund launches that may impact fund reporting data, track and report metrics related to supporting project's need to meet 38a-1 requirements and ISO compliance

Global Investment Performance Standards and Performance Reporting (GIPS)

Understanding of associated GIPS requirements and standards related to calculating and presenting investment performance, recommend composite construction parameters including defined strategies for project approval, perform data checks and outlier reviews, work with third parties to support verification requests, perform account level quality control activities including validating composite construction, etc.

PAY

Perform reconciliation, oversight and administration of proprietary income and accounting yield forecasting, conduct and analyze income, expense, and distribution yield projections and analysis at security and fund level, and identify, investigate and resolve data anomalies and forecasted vs actual differences to challenge and improve forecasting.

Global Bank Oversight

Oversee a vast range of primarily fixed-income mutual fund strategies supported by third-party accounting agents globally. Review and confirm daily accounting reconciliations,

back, middle, and front office teams to confirm all issues are addressed time. Remediate all errors and ensure adequate process documentation and control for high-risk areas. Coordinate various projects related to technology, process improvement, and new business integration

Position Summary

Level: Lead Junior Associate

As an experienced Lead Junior Associate, you will be responsible for individually delivering high quality work products within due timelines.

Work you'll do:

As a Lead Junior Associate, you will play a key role in ensuring the smooth execution of routine financial transactions in accordance with the guidelines established. Your responsibilities will include verifying documentation, updating account information, and performing exception-based calculations with accuracy and attention to detail. You will serve as a point of contact for financial advisors, internal teams, and external vendors, facilitating clear and effective communication across stakeholders.

In this role, you will continuously build and share your knowledge of the brokerage industry, actively seek to understand departmental functions, and contribute innovative ideas and solutions to enhance operational efficiency. We're looking for candidates who are proactive, detail-oriented, and eager to collaborate in a dynamic environment.

The team:

technology, you will help ensure every solution is seamlessly integrated with Industry Advantage and aligned with sector-specific requirements. With your focus on innovation and measurable value, you will empower clients to achieve strategic objectives, enhance operational efficiency, and stay competitive in a rapidly evolving marketplace by addressing core business challenges and opportunities across industries.
