Energy & Sustainability Report
Xerox EMEA
Q2 2026

Reporting Period

Reporting Period: Jan 2025 – Jun 2026

Portfolio Overview (EMEA)

Metric	2026	2025	YoY / QTD Change
Sites / Floor Area	127 sites	122,034 m ²	–
YTD Energy (kWh)	19,610,260	20,023,004	-2.1%
YTD Electricity (kWh)	17,128,513	16,711,587	+2.5%
YTD Natural Gas (kWh)	2,481,748	3,311,418	-25.1%
YTD Emissions (tCO ₂ e)	4,270	4,280	-0.2%
QTD Energy (kWh)	9,855,560	9,646,505	+2.2%
Renewable Mix	59.9% renewable	40.1% non-renewable	–

Dundalk Toner (Ireland) is the largest single consumer, accounting for 22% of QTD consumption. The recently acquired Go Inspire Portfolio (6 sites) now represents 28% of total EMEA energy consumption.

Regional EUI (kWh/m²)

UK&I - GI	Eastern Europe	MEA	Central Europe	Nordics	UK&I	Southern Europe	DACH
624	522	284	266	264	258	249	242

Country Breakdown

Country	YTD Energy	YoY Var	EUI 2026	Certified Renewable %
United Kingdom	7,176,283 kWh	-0.6%	423 kWh/m ²	84% (elec. 100% renewable)
France	2,553,991 kWh	-6.2%	216 kWh/m ²	53%
Netherlands	1,301,939 kWh	+48.8%	807 kWh/m ² (+64.7%)	94%

NLDVNR09 – De Amfoor 2 (Netherlands) saw YTD energy jump 120.1% (947,020 vs 430,354 kWh), with EUI nearly tripling (3,183 vs 1,131 kWh/m²) — attributed to a seasonal heating pattern rather than a data anomaly.

Data Quality

Of 122 sites, **58% of energy data (11.44M kWh) is proxied** vs. 42% invoiced. Electricity data is 74% proxied / 11% invoiced / 15% mixed; Natural gas is 79% proxied / 2% invoiced / 19% mixed — indicating a meaningful reliance on estimated rather than billed data across the portfolio.

19,610,260	-2.1%	17,128,513	2.5%	2,481,748	-25.1%

Portfolio commentary

For April 2026 - June 2026, the EMEA portfolio energy consumption has increased by 2% (QTD). Electricity consumption cross the portfolio has increased by 3% (QTD), and Natural gas has been decreased by 5% (QTD). The Largest Consumer is Dundalk Toner, which accounts for 22% QTD consumption. The data is based on received invoices and meter data. Given the acquisition of the Go Inspire Portfolio (Consisting of 6 sites), it accounts for 28% of the total energy consumption of the entire Xerox EMEA portfolio.

Emissions YoY

Regional EUI (kWh/m²)

Regional commentary

UK &I (GI) has become the higher EUI region in Q2 2026 with 624 kWh/m2. The Non-GI remaining part of the region expereined relatively stable consumption. Eastern Europe is the second largest EUI region which has 522 kWh/m2 contributing to Xerox EMEA portfolio.

Commentary

The largest consumer in Central Europe is De Amfoor in the Netherlands. The reduction in EUI follows the seasonal pattern observed last year (phase-out of the heating season starting in Q2 each year).
