Position summary

The USI BSO NSE ITS team develops Custom products, applications and services for Deloitte professionals globally. As a team we are here to delight customers by embracing design thinking, agility, innovation, and a customer first focus.

Work you'll do

A MuleSoft Developer is responsible for designing, developing, and maintaining integration solutions using the MuleSoft Anypoint Platform. The role involves working closely with business analysts, project managers, and other developers to understand business requirements and translate them into technical solutions.

This position requires excellent interpersonal and communication skills. You will communicate, align with the business and report to the Technical Manager.

Must be capable of working independently and collaboratively, demonstrated self-starter, with the ability to set the direction when there is little or no oversight. As a Technical Lead, should be able to coach, mentor & guide junior developers within the team.

Responsibilities

- Design and develop integration solutions using MuleSoft Anypoint Platform.
- Collaborate with business analysts and stakeholders to understand integration requirements.

- Troubleshoot and resolve integration issues.
- Create and maintain technical documentation.
- Stay updated with the latest MuleSoft features and best practices.
- Work in an Agile environment and participate in sprint planning, daily stand-ups, and retrospectives.

The team

At Deloitte, we're all about collaboration. And nowhere is this more apparent than among our 2,000-strong internal services team. With our combined specialist skills, we provide all the essential support and advice our client-facing colleagues need, right across the firm. This enables them to focus all their efforts on delivering the best service possible to their clients. Covering seven distinct areas; Human Resources, Clients & Industries, Finance & Legal, Practice Support Services, Quality & Risk Services, IT Services, and Workplace Services & Real Estate, together we live, breathe and deliver the Deloitte experience.

Location: Hyderabad

Work shift Timings: 11 AM to 8 PM

Qualifications

- Bachelor of Engineering/ Bachelor of Technology
-

Required Skills & Desired Experience:

- Proficiency in MuleSoft Anypoint Platform, including Anypoint Studio, API Manager, and Runtime Manager.
- Strong understanding of RESTful and SOAP web services.
- Experience with DataWeave for data transformation.
- Knowledge of RAML or OpenAPI for API design.
- Familiarity with various MuleSoft connectors and components.
- Experience with message queuing technologies (e.g., JMS, RabbitMQ).
- Understanding of integration patterns and best practices.

- Familiarity with various MuleSoft connectors and components (e.g., SFTP, VM, DataBase)
- Experience with Anypoint Monitoring (log search).
- Experience with message queuing technologies (e.g., JMS, AnypointMQ).
- Strong problem-solving and analytical skills.
- Excellent communication and collaboration abilities.
- Ability to work independently and as part of a team.
- Attention to detail and a commitment to quality.
- Adaptability and willingness to learn new technologies.
