PROFESSIONAL SUMMARY

Data-driven Strategy Analyst with 3 years of experience extracting, analyzing, and synthesizing large volumes of data into compelling, leadership-ready reports and interactive dashboards. Proven ability to support senior stakeholders with strategic insights, develop SOPs, and drive process improvements through quality controls and automation. Hands-on experience leveraging GenAI tools (ChatGPT, Microsoft Copilot) and prompt engineering to accelerate research, reporting, and executive-ready deliverables. Comfortable operating in cross-functional environments — equally effective as a team collaborator and independent contributor. Strong foundation in advanced Excel, Power BI, Macros, and PowerPoint for high-impact presentations and data storytelling.

PROFESSIONAL EXPERIENCE

JLL (Jones Lang LaSalle) Bengaluru, India
Analyst — Sustainability Data & Reporting 2025 – Present

- Extracted, cleaned, and synthesized large volumes of sustainability data (energy, emissions, water, waste) to develop compelling, insightful reports that aided leadership decision-making — directly supporting senior manager and director-level stakeholders.
- Built and maintained **interactive Power BI and Excel dashboards** to visualize trends, patterns, and KPIs across ESG metrics, enabling data-driven real estate and sustainability strategy decisions.
- Developed visually appealing, meaningful **PowerPoint presentations** for leadership summits and executive readouts — combining data storytelling with strategic narrative.
- Implemented and improved **quality controls and SOPs** across reporting projects — documenting process steps, identifying patterns, and driving consistency and accuracy across all deliverables.
- Leveraged **GenAI tools (ChatGPT, Copilot)** to accelerate research synthesis, first-draft generation, and report structuring — applying prompt engineering techniques to convert stakeholder asks into structured, high-quality outputs with human review before sharing.
- Applied **AI-specific quality checks** — reconciling figures to source data, flagging unsupported claims, and tracking rework themes to continuously improve AI-assisted output quality.
- Managed and regularly updated the **internal team SharePoint site** — maintaining project trackers, daily team logs, and work-related documentation to ensure seamless team coordination.
- Collaborated cross-functionally with IT, Talent, and other internal teams to gather required inputs and deliver integrated, accurate final reports for leadership.
- Supported **ESG reporting frameworks** (GRI, TCFD, CDP) — ensuring data integrity, compliance, and alignment with global sustainability reporting standards.
- Proactively identified opportunities to enhance current reporting processes, driving efficiency improvements through automation using **Macros - Excel automation**.

Tools: Power BI, Advanced Excel, Macros, PowerPoint, Envizi, SharePoint, GenAI (ChatGPT, Copilot), Prompt Engineering

KSCST — Indian Institute of Science (IISc) Bengaluru, India
Environmental Consultant 2021 – 2024

- Conducted in-depth sustainability research and data analytics to support ESG strategy and decarbonization initiatives — synthesizing findings into structured reports and dashboards for client and leadership consumption.
- Delivered data-driven presentations and reports on environmental strategy, translating complex analytical findings into clear, actionable recommendations for stakeholders.
- Collaborated with cross-functional teams to gather inputs, validate data, and ensure accuracy across all deliverables — maintaining a high standard of attention to detail.
- Applied analytical thinking to identify patterns, trends, and insights from environmental datasets — supporting evidence-based decision-making on sustainability priorities.

Tools: Excel, QGIS, Data Analysis, ESG Reporting, PowerPoint

University of Kassel

Germany (Remote/On-site)
2020 – 2021

Research Intern — Sustainability Data & Analytics

- Supported academic sustainability data analysis and reporting projects — contributing to research synthesis, data visualization, and structured deliverable preparation in a cross-cultural international environment.
- Demonstrated ability to work independently with minimal supervision, delivering quality research outputs within defined timelines.
- Gained exposure to global sustainability research frameworks and international reporting standards, broadening analytical and strategic perspective.

Tools: Excel, Data Analysis, Research Reporting

TECHNICAL & FUNCTIONAL SKILLS

Data & Reporting: Advanced Excel, Power BI, Envizi, QGIS, Data Analysis, Dashboarding

Automation & Productivity: Macros - Excel Automation, SharePoint Administration, SOP Development

Domain Expertise: ESG Reporting (GRI, TCFD, CDP), Sustainability Analytics, Decarbonization Strategy, Real Estate Data

Presentation & Communication: Advanced PowerPoint, Leadership Readouts, Executive Summaries, Data Storytelling

GenAI & Prompt Engineering: ChatGPT, Copilot, Structured Prompt Design, Agentic Workflow Support, AI Quality Controls

Soft Skills: Stakeholder Management, Cross-functional Collaboration, Attention to Detail, Independent Contributor, Cross-cultural Communication

EDUCATION

MSc Environmental Science
Bangalore University

2019 – 2021

BSc — Science
M.S. Ramaiah College, Bengaluru

2016 – 2019

KEY HIGHLIGHTS

- Hands-on experience using GenAI tools with structured prompt engineering to deliver faster, higher-quality executive-ready reports — directly aligned with Deloitte RES's AI adoption priorities.
- Proven track record of delivering leadership-ready dashboards, presentations, and SOPs for senior stakeholders across JLL and KSCST.
- International research exposure (University of Kassel, Germany) — demonstrating cross-cultural communication and independent work capability.
- Strong command of the full reporting lifecycle — from raw data extraction and analysis through to polished leadership deliverables and process documentation.
