

Energy & Sustainability Report  
Xerox EMEA

Q1 2026

## Reporting Period

Reporting Period: Jan 2025 – March 2026

## Portfolio Overview (EMEA)

| Metric                             | 2026                                   | 2025                                      | YoY / QTD Change |
|------------------------------------|----------------------------------------|-------------------------------------------|------------------|
| Sites / Floor Area                 | 112 active sites/90,978 m <sup>2</sup> | 127 active sites / 122,839 m <sup>2</sup> | –                |
| YTD Energy (kWh)                   | 7,369,423                              | 10,385,934                                | -29%             |
| YTD Electricity (kWh)              | 6,218,508                              | 8,364,022                                 | -25.7%           |
| YTD Natural Gas (kWh)              | 1,150,915                              | 2,021,912                                 | -43.1%           |
| YTD Emissions (tCO <sub>2</sub> e) | 1,427                                  | 2,210                                     | -35.4%           |
| QTD Energy (kWh)                   | 7,369,423                              | 10,385,934                                | -29%             |

Accounting QTD consumption, acquired Go Inspire Portfolio (6 sites) now represents 67% of total EMEA energy consumption.

## Regional EUI (kWh/m<sup>2</sup>)

| UK&I - GI | Eastern Europe | MEA    | Central Europe | Nordics | UK&I   | Southern Europe | DACH   |
|-----------|----------------|--------|----------------|---------|--------|-----------------|--------|
| 663.83    | 603.73         | 285.53 | 214.75         | 260.37  | 191.88 | 279.5           | 261.86 |

## Country Breakdown

| Country        | YTD Energy    | YoY Var | EUI 2026               | Certified Renewable %      |
|----------------|---------------|---------|------------------------|----------------------------|
| United Kingdom | 3,649,844 kWh | -0.1%   | 432 kWh/m <sup>2</sup> | 87% (elec. 100% renewable) |
| France         | 1,295,960 kWh | -9.7%   | 221 kWh/m <sup>2</sup> | 54%                        |
| Netherlands    | 243,705kWh    | -57.8%  | 304 kWh/m <sup>2</sup> | 88%                        |

## Data Quality

Of 112 sites and having a floor area of 90,978m<sup>2</sup>, **62%** of energy data is invoices and **38%** of the data has been proxied for Q1 2026 for the entire XEROX EMEA Portfolio.

Portfolio Overview

| No. of Sites | Total Floor Area (m²) | Year-to-date Energy (kWh) | Previous Year Energy (kWh) | YoY Energy Change |

Portfolio commentary

For January '26 – March 2026, the EMEA portfolio energy consumption has decreased by 29% (QTD). Electricity consumption across the portfolio decreased by 26% (QTD), and natural gas decreased by 43% (QTD). Given the acquisition of the Go Inspire portfolio (consisting of 6 sites), it accounts for 65% of the total energy consumption of the entire Xerox EMEA portfolio. The data is based on received invoices and meter data.

Emissions YoY

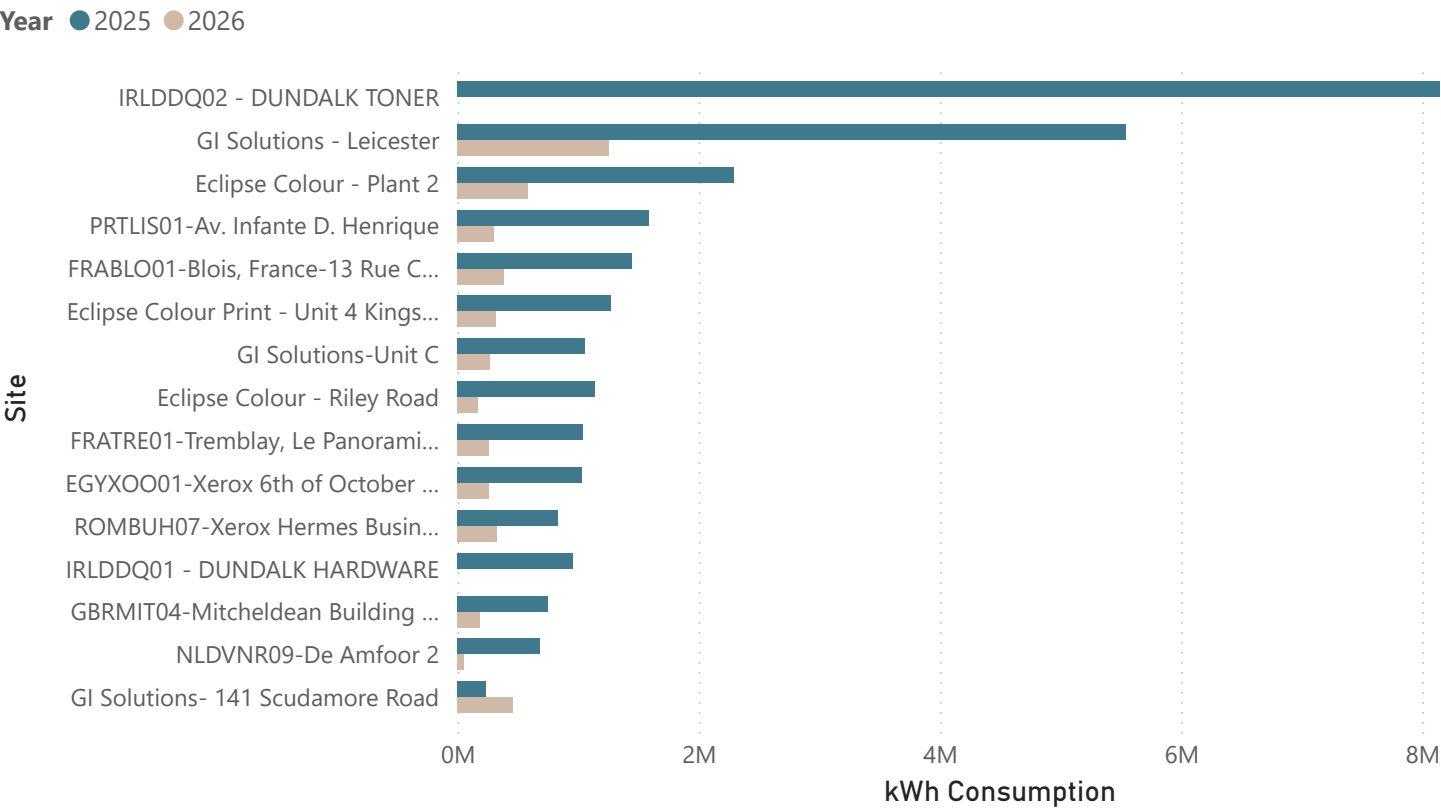

Regional EUI (kWh/m²)

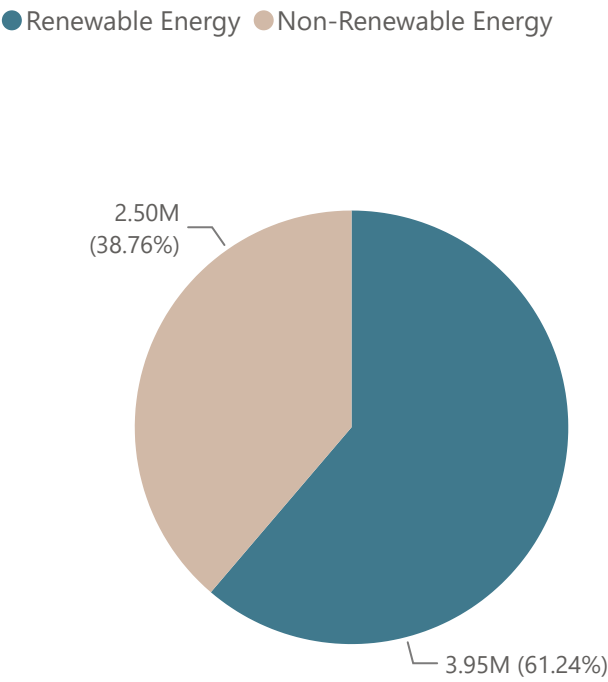

Regional commentary

UK & I(GI) has become the higher EUI region in Q1 2026 with 663 kWh/m2. The Non- GI remaining part of the region experienced relatively stable consumption in relation to previous year. Eastern Europe has an EUI of 603 kWh/m2 contributing to Xerox EMEA portfolio.

Commentary

The largest consumer in Central Europe is De Amfoor in the Netherlands. The reduction in EUI follows the seasonal pattern observed last year (phase-out of the heating season starting in Q2 each year).
